

## SIGNAL ARM EXTENSION INSTALLATION INSTRUCTIONS

This small turn signal arm extension is used to make the arm easier to reach when using a steering wheel spacer. Small, light, unobtrusive, and self-adhesive.

### Install as follows:

1. Check positioning of the extension on bottom of turn signal arm, then clean area where the extension will be adhered using alcohol wipe:

2. Peel backing off adhesive and carefully align into position before pressing into place. Press firmly for one minute:

3. That's it! Extension is ready to use. Adhesive will fully cure after about 24 hours but should be secure enough to use immediately. Can be removed if needed by slowly prying off with a plastic tool.

Please use your best judgement with all of the above, and let me know if you have any trouble Happy driving!
